DESCRIPTION

When size is an issue, and your volumes justify, the Innotech Systems' Credit Card remote is an ideal high-quality cost-effective solution.

You may define your own proprietary infrared codes, draw from the acclaimed industry-leading Innotech Systems' remote control library of entertainment system codes, or combine both for applications such as set top boxes or PC/TV.

The Innotech Systems Inc universal remote controller library is unequaled and is continually updated as new consumer systems are brought to market. Through the use of proprietary compression algorithms, ISI can provide remote control micro-controllers with the most complete consumer product coverage available today! Innotech Systems Inc. is *your* competitive edge.
