Bringing Your Ideas to Life

Make us part of your team, and we'll bring your ideas to reality. Affordably and on time.

Our design team has the experience and know-how to let you bring your ideas to market. Fast. Using the latest design tools, our unique intellectual property, and our project management experience, we will bring your idea through all stages of the development process:

- ◆ product concept
- ◆ system design
- ◆ electronic design
- ◆ software/firmware design
- ◆ mechanical design
- ◆ printed circuit board design
- ◆ industrial design
- ◆ IP licensing

Our off-shore manufacturing affiliates can then produce your product at the lowest possible cost.

Next Generation Technologies... Today

Innotech Systems has unexcelled expertise in the very latest consumer technologies including

- ◆ Voice Recognition
- ◆ Voice and Music Synthesis
- ◆ Infrared and RF Wireless Remote Control
- ◆ User Interface

Bringing embedded hands-free control to the ultimate in its evolution, Innotech has become a technology leader in embedded voice control systems. The world's most advanced voice control technology lets users tell your product what to do — without lifting a finger! Our advanced voice synthesis can even talk consumers through system set up and operation.

With Innotech's highly integrated state-of-the-art technology, you can add a voice interface to your product for less than you could ever imagine.

Cost Reduction

Let us help make your existing design more competitive through size and cost reduction.

Using such advanced technologies as embedded system design, semi-custom and full custom ASICs, and advanced circuit board manufacturing techniques, we can make your product more competitive.

Our Far Eastern manufacturing partners will lower your production costs and enhance your quality by producing your products in the most modern factories anywhere in the world.

Remote Control and Wireless

With worldwide recognition as one of the foremost leaders in infrared remote control and wireless technology, Innotech Systems has been a premiere supplier of OEM remote controls and remote control technology for fifteen years. We have developed specialty remote controls that are among the most popular remote control models of all time, conventional remote controls and receivers used in the most advanced consumer and commercial applications, and the revolutionary InVoca voice-operated and Accenda voice-interactive remote controls. The Innotech infrared remote control code library is among the most comprehensive available anywhere in the world and has been licensed to many of the world's most prestigious electronic manufacturers.

The Solution You Need... When You Need It

We will provide the solution you need whether it is a completely boxed system ready to ship, just a control board, integrated circuit, software API, intellectual property license, or industrial design with an optimized human interface.
