

*Control Your Set Top Box/TV/VCR/Cable/Satellite/
Home Theater Component - By Voice!*

OEM Voice Operated Remote Control

**The World's Most Advanced Remote Control Lets Users Tell
Your System What To Do — Without Lifting a Finger!**

***Why control your 21-st century system with
yesterday's old-fashioned push-button technology?
Drive your sales with a modern voice-operated
remote control from Innotech Systems.***

Using technology so advanced that it has been used in interplanetary space probes, Innotech's Voice Operated Remote Control Technology uses the sound of your voice to control your system! The remote control converts spoken words into remote control signals.

Able to recognize over fifty commands — in any language — Innotech's OEM Voice Operated Remote Control is so automated it can perform complex multi-step operations from a single word and even surf the channels for your customers while they just lean back and watch!

Innotech Systems will customize the remote control for your particular needs, making your remote control as unique as the rest of your product.

-
